MOHD AIZAL BIN BAHARUDDIN

.NET Full-Stack Developer | C# · ASP.NET · VB.NET · MS SQL Server | Enterprise Application Delivery

Sepang, Selangor, Malaysia | mohdaizal@gmail.com | +60 13-397 1830 | linkedin.com/in/mohd-aizal-baharuddin-0b0b0519b | Available from 1 November 2026

PROFESSIONAL SUMMARY

Application Developer with 5+ years of hands-on .NET development including 4 years building and supporting enterprise web and desktop applications in a high-volume manufacturing environment and 19 years of total professional experience spanning software delivery, IT operations and programme management. Designs, develops and maintains C#, ASP.NET and VB.NET applications backed by MS SQL Server, Entity Framework Core and IIS-hosted services, with REST API integrations and real-time features built on SignalR. Currently modernises legacy systems through workflow automation and applies AI-assisted engineering practices, reviewing generated solutions for maintainability, security and compliance. Strong at translating business requirements into working systems and resolving production issues under pressure. Available immediately.

TECHNICAL SKILLS

Backend: C#, ASP.NET, .NET Framework, .NET Core, .NET 8 and later, VB.NET, .NET Minimal API, REST APIs, Web Services, SignalR

Data & ORM: Microsoft SQL Server schema design, T-SQL, stored procedures, query optimisation, data integrity; Entity Framework / EF Core (code-first, migrations, LINQ)

Frontend: JavaScript, jQuery, HTML5, CSS, Bootstrap

Web & DevOps: IIS, Git, Docker, SDLC, application deployment and release support

Application Support: Production troubleshooting, incident resolution, application maintenance, system improvement, end-user training

AI-Assisted Engineering: GitHub Copilot, prompt engineering, AI-assisted documentation and code review

CAREER NOTE

2008–2021: Delivered IT operations, application support and programme-management roles across government and private sectors, including the Prime Minister's Department and the Ministry of Youth & Sports. Returned to full-time .NET development in 2022 and has since designed and shipped five production enterprise systems at Panasonic.

PROFESSIONAL EXPERIENCE

.NET Application Developer — Panasonic AVC Networks Kuala Lumpur Malaysia Sdn. Bhd.

Jun 2022 – Oct 2026 | Shah Alam, Selangor

- Design and develop enterprise web and desktop applications using C#, VB.NET, ASP.NET, JavaScript, jQuery, HTML, Bootstrap and MS SQL Server, supporting business-critical manufacturing operations.
- Build REST APIs that integrate legacy systems with a modern workflow engine, enabling reliable system-to-system integration across production and logistics functions.
- Develop an internal bidding application using Entity Framework Core and SignalR, delivering real-time bid updates so staff can bid on company items without manual coordination.
- Design and implement workflow automation that standardises business approval processes and removes manual handoffs.
- Manage MS SQL databases and IIS-hosted applications, and participate across the full SDLC including testing, deployment and post-release support.

- Provide application support for production systems, investigating and resolving incidents for operational teams.
- Integrate AI into development workflows and evaluate AI-generated solutions for maintainability, security and compliance with internal standards.

Key Achievements

- Built an inventory transfer ticketing system with workflow approval, reducing processing time from 2 days to 20 minutes.
- Delivered a workflow engine that modernised legacy applications and standardised business approval processes across the organisation.
- Built a Visitor Management System supporting 100+ daily visitors, logistics vehicles and scrap lorries.
- Built a weighbridge system that records lorry weight before and after scrap loading to satisfy Customs compliance requirements.

IT Support — Barisan Mahamega Sdn. Bhd.

Jan 2022 – May 2022

- Provided IT infrastructure and application support, managed software installation and upgrades, and resolved network and hardware issues.
- Delivered user training on internally developed applications and supported end users with technical issues.

IT & Operations Support — UV Kool Tint, Seremban

Feb 2020 – Dec 2021

- Installed and configured IT hardware and software, provided application troubleshooting, and supported day-to-day business operations.

Senior Training & Development Officer — Institute of Leadership Excellence & Development, Ministry of Youth & Sports

Jan 2019 – Dec 2019

- Managed leadership development programmes, coordinated trainers and logistics, facilitated workshops and prepared reports.

Training & Development Officer — Biro Tatanegara, Prime Minister's Department

Feb 2008 – Dec 2018

- Planned and managed nationwide training programmes, coordinated government and private-sector engagement, and facilitated organisational development programmes.

.NET Application Developer — Trilevel Sdn. Bhd.

Dec 2006 – Jan 2008

- Designed and developed web applications using the .NET Framework, gathered client requirements and delivered user training.
- Conducted testing, debugging and deployment activities throughout the software delivery lifecycle.

EDUCATION

Bachelor of Computer Science (Computer Networking) — Universiti Putra Malaysia, 2006
